Detailed Action

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 5-8 is rejected under 35 U.S.C. 102(b) as being anticipated by Takashima et al (US 6,831,882).
3. Regarding Claim 5, Takashima et al shows (Figs. 19-22) an optical pickup apparatus comprising: an optical pickup (114) that includes an optical pickup base (115) on which a laser light source (102) and an optical system are installed, wherein the optical system includes an objective lens movable in a focusing direction and a tracking direction, and at least one of records information on an optical recording medium (113) and reproduces information from the optical recording medium with a laser beam from the laser light source; a supporting frame that supports the optical pickup base movably in the tracking direction; a turntable on which the optical recording medium is placed; a protective cover (133) that is arranged between the optical recording medium placed on the turntable and the optical pickup, fixed to the supporting frame, and protects the optical pickup; and a heat conducting member (136) that is connected to the optical pickup and the protective cover, and conducts heat generated in the optical pickup to the protective cover.

4. Regarding Claim 6, Takashima et al shows (Figs. 19-22) the optical pickup apparatus, wherein an end of the heat conducting member (136) is connected to any one of a package that accommodates the laser light source (102) on the optical pickup base and a holder that holds the package.
5. Regarding Claim 7, Takashima et al shows (Figs. 19-22) the optical pickup apparatus, further comprising an elastic member (138) that presses the heat conducting member (136), wherein an end of the heat conducting member is pressed by the elastic member, and fixed to the optical pickup; and the other end of the heat conducting member is pressed by the elastic member, thereby making contact with the protective cover (133).
6. Regarding Claim 8, Takashima et al shows (Figs. 19-22) the optical pickup apparatus, wherein the heat conducting member (136) is formed as a plate spring (138) arranged between the optical pickup and the protective cover.
